GERFLOR GROUP

continually moving forward

To create, manufacture & market innovative, design-led & eco-responsible solutions for flooring, walls & their finishes.

To anticipate the specific needs of the users, specifiers, installers & distributors around the world.

To provide competitiveness & success for all our customers.

INDUSTRIAL EXPERTISE in several fields

INTERNATIONAL PRESENCE

Worldwide presence & proximity to our customers through:

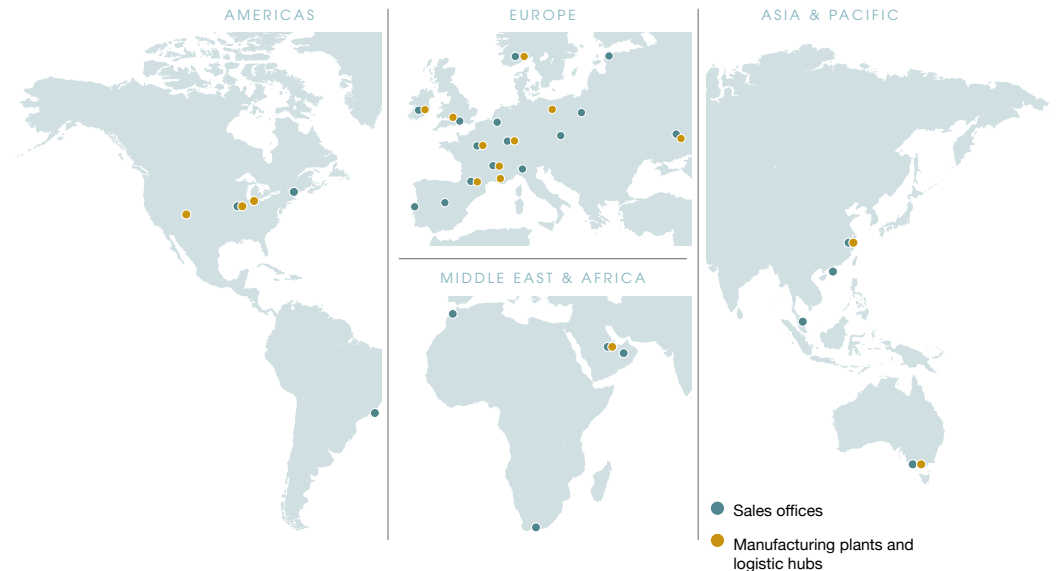

✓ 28 subsidiaries & a broad network of distributor partners.

✓ 17 production plants & logistic hubs.

Sales growth
Gerflor group turnover

✓ STAFF: 4000 employees, 40 nationalities.

DESIGN trendy & creativity

- ✓ Our in-house Creation Studio brings product design originality & freshness.
- ✓ Our innovative ideas perfectly fit both market needs & creative expectations of interior designers, housing specifiers & architects.
- ✓ Our moto, be different
70% of sales are achieved with product ranges less than three years old.

DECORATOR

- ✓ Every year, Gerflor renews its collections and creates new designs
- ✓ Designs solutions that can be combined and mixed to create custom spaces

INNOVATIVE SOLUTION

GERFLOR SPIRIT

- ✓ 3 Research & Development centers dedicated to product innovation.
- ✓ 140 engineers for ultimate flooring solutions that anticipate the needs of our customers.
- ✓ Partnerships with laboratories and universities around the world enable Gerflor to benefit from the last materials & emerging technologies.

Innovation distinguishes between a leader and a follower.

EXPERT quality & choice

- ✓ Extensive product range
- ✓ Top-quality products designed for high traffic
- ✓ Highly resistant
- ✓ Solutions for all customer needs:
Installation type, size, all-uses, related accessories

CLEVER quick & easy

- ✓ Make life easier
- ✓ Products installed without glue and without subfloor preparation
- ✓ Optimal user-friendliness
- ✓ Can be installed with a utility knife

INVENTOR new solutions for the home

Gerflor has developed since 2000 the first textile backing roll.

This new category of product has transformed the vinyl roll market and represents today 40% of the global offer.

GFT range : 6 product ranges to match all customer needs

- HQR
- Home Comfort
- Textline
- Loftex
- Solidtex
- Primetex

2000
Textline

The original patented GFT textile backing:
Unroll it's laid

MARKET informations & orientations in Western Europe

A SOLUTION ECO-RESPONSIBLE

Committed to
SUSTAINABLE DEVELOPMENT

RAW MATERIALS

HEALTHY RAW MATERIALS

- **No** heavy metals, **no** solvents, **no** formaldehyde
- **All materials are 100% compliant with European standards (REACH)**

SUSTAINABLE PRODUCTS

recycled content integration

- Vinyl rolls GFT:

Patented GFT technology: backing with fibres made from recycled plastic bottles

for 1m² of Texline

INDOOR AIR QUALITY

Low VOC emissions

- All our products conform to **Floorscore**, **AgBB**, **A+ (France)** and **M1 (Finlande)** standards

- TVOC emissions after 28 days **<100µg/m³**

- Gerflor loose-lay solutions (GFT rolls, tiles and snap-together planks): no glue required.

VOC free system

GOING
FURTHER

ENVIRONMENTAL FOOTPRINT

- All our products are **eco-designed** based on a life-cycle analysis model in order to **reduce their environmental impact**
- Our products are regularly assessed in accordance with **ISO 16000 standards**

RECYCLING

- **100% recyclable** materials
- **All recycled materials** used in our products are checked and comply with the European REACH Regulation

FLOOR-COVERING WITH EXCLUSIVE PROPERTIES THANKS TO PATENTED **GERFLOR FIBRE TECHNOLOGY**

FEATURES

- Wearlayer and protective varnish
Pureclean finish
- Patterned foam
- Fibreglass interlayer
- Compact stability layer and anti-mould bonding layer
- Technical fibre backing made of over 95% recycled fibres

BENEFITS

- Traffic resistance
Protection against scuff marks and scratches
- Solvent free ink
Realistic printed design
- Dimensional stability during temperature changes
- Installs with no or with minimum subfloor preparation
- Resistant to indentation
Acoustic comfort and sound reduction

PRODUCT BENEFITS

INCREDIBLY **COMFORTABLE**

Acoustics > Ideal for apartments and for covering hard floors that do not absorb noise
Warmer and flexible > **comfortable to walk on**

ALL USES

Watertight

Residential products: 2, 3 and 4 mm thick
Guaranteed 10-15 years

HIGHLY **RESISTANT**

Scratch-resistant varnish that protects and resists stains
Resistant fibres that protect against dents

Spring-like effect of fibres

GREEN

TVOC < 100 µg/m³

95% recycled fibres

Laying **without glue**

100% recyclable

make 1m² of Texline

READY **TO INSTALL**

No adhesive

No subfloor preparation

Economical, quick and easy!

Existing subfloor Concrete

Existing subfloor Tiles

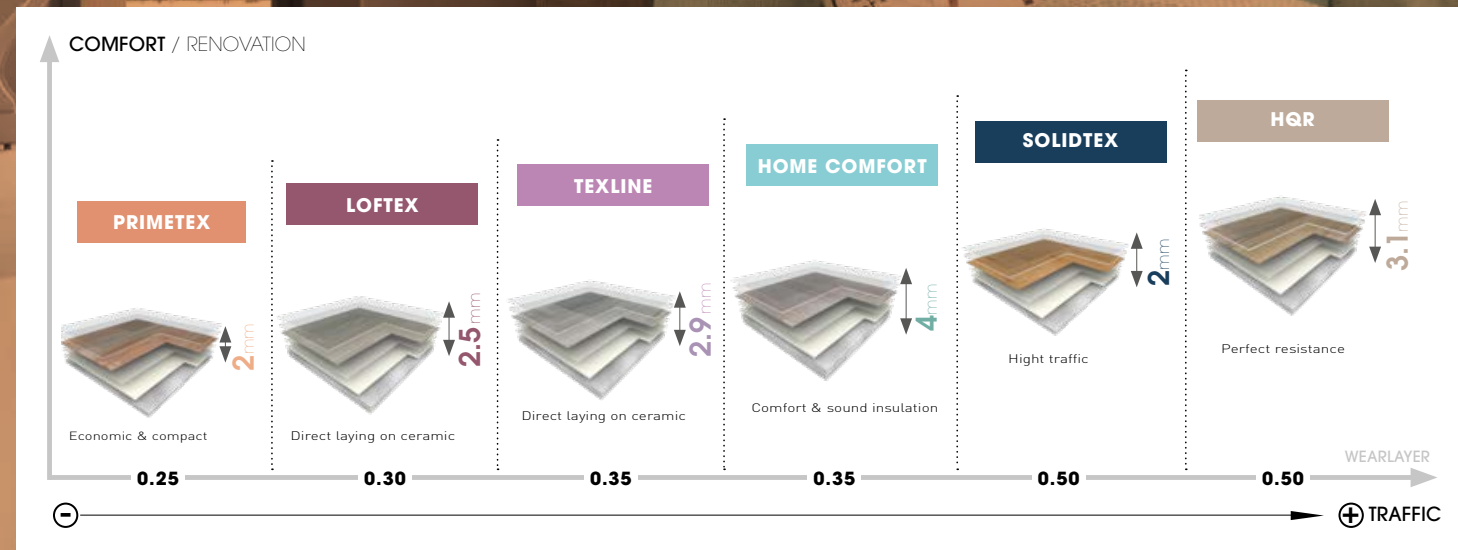

GFT fibres smooths out unevenness of the existing floor.

EXCLUSIVE COLLECTION

THE DESIGN WAY

HIGH SEDUCTION HIGH TRAFFIC

HIGH COMFORT

A COMBINATION OF DIFFERENT MATERIALS PROVIDING A COMBINATION OF BENEFITS

1 EASY TO LAY

- ▶ **SAVES MONEY AND TIME:** product ready to lay, no preparation of the floor and no adhesive required
- ▶ **UNROLL... IT'S DONE!** GFT takes up the unevenness of the existing floor and can be laid directly
- ▶ Ideal for refurbishment and rented properties

2 ULTRA COMFORTABLE

- ▶ **ACOUSTIC INSULATION:** ideal for rooms on upper floors and for apartments
- ▶ **THERMAL INSULATION:** flooring that never feels cold underfoot
- ▶ **COMFORTABLE TO WALK ON:** its pliable fibres make it feel springy

3 EASY TO LIVE WITH

- ▶ **EASY-CLEAN:** hygienic and antiallergenic
Simply rinse with soapy water
- ▶ **TOTALLY WATERTIGHT:** prevents moisture rising and mould
Suitable for wet areas

HIGH TRAFFIC

IDEAL PROPERTIES FOR PROFESSIONAL USE

- ▶ **IDEAL FOR INTENSIVE/ HIGH TRAFFIC USE:** As it is 3.10 mm thick and has a 0.50 mm wearlayer.
- ▶ **MULTI-PURPOSE APPLICATIONS:** Hardwearing, suitable for domestic and semi commercial use: housing, residences, offices, waiting rooms, independent shops and hotels...
- ▶ **DURABLE:** Warranty: 15 years for residential use and 5 years for commercial use.

PU HQR finish
Patterned foam
Fibreglass interlayer
Compact balancing layer
Anti-mildew bonding layer
Fiber backing,
over 95% recycled fibres

HEALTH

- Formaldehyde-free
- Lead-free, no heavy metals
- Solvent-free
- No harmful plasticizer
- Low VOC emission
- No glue
- GFT backing: > 95% recycled fibres

ENVIRONMENT

- 100% recyclable
- ISO 14001
- Soapy water cleaning

LAYING

Gerflor floor coverings are high quality products developed to last. No warranty can be claimed unless the product has been laid according to the following specifications:

The subfloor must be smooth, hard, dry and clean.

Unroll the floor covering 24 hours before it is due to be installed.

The floor covering should not be laid in rooms where the temperature is below 15°C.

Although HQR is resistant to subfloor moisture we recommend that the floor construction should contain a Damp Proof Membrane.

Can be installed on underfloor heating (up to 28°C).

Cold-weld the joints for perfect water-tightness.

Thanks to its special patented composition, HQR can be laid directly on most existing subfloors using loose laying.

SUBFLOOR PREPARATION:

On wooden floorboards and on ceramic tiles: HQR can be laid directly without any subfloor preparation. No levelling compound (finishing) needs to be applied even if there are open joints:

- up to 5 mm wide and a maximum depth of 1 mm in existing tiling
- up to 3 mm wide in wood flooring.

On textile carpeting (felt or needle punch): HQR can be installed directly over the existing carpeting as it has excellent resistance to indentation.

On concrete: HQR can be installed loose-laid or semi-permanently without any special surface preparation. Use double-sided tape along the edges of the room. A rough concrete surface should be treated with a smoothing compound beforehand.

INSTALLATION:

Loose laying: Laying without glue recommended below and up to 35 sqm. Use double sided tape or hook & loop strips around the edges and along the joints for a perfect and invisible fit.

Permanent laying: Laying with glue mandatory above 35 sqm. Use a single stick acrylic glue (approximately 250g/sqm) and a finely notched trowel and cold weld the joints.

CLEANING & CARE

Initial cleaning: Before commencing a regular maintenance programme, initial cleaning of the floor will be necessary to remove dirt accumulated during laying and other building works. Remove debris, sweep floor and vacuum to remove loose dirt. Wash floor with damp mop and using cold water and neutral detergent. Replace the water and solution if necessary. Remove stubborn marks with a non-abrasive pad.

Maintenance: Remove loose dirt with a broom or vacuum cleaner. Wash floor with damp mop and used cold water.

Cleaning: Frequency of periodic maintenance will depend on the amount of traffic and on the type of laying. Wash floor with damp mop using cold water and neutral detergent.

Discoloration: Discolouration can occur in any resilient floor covering if it comes into contact with pigment-containing substances such as bituminous materials, mastic, asphalt, oil, shoes with black rubber soles, or rubber rollers may cause discoloration.

Areas of use: domestic use

Wear layer
Pureclean finish
Patterned foam
Fibreglass interlayer
Compact balancing layer
Anti-mildew bonding layer
Fiber backing,
over 95% recycled fibres

LAYING

The subfloor must be smooth, clean, dry, undamaged and flat.

Recommendations: unroll the floorcovering 24 hours before laying.

Floor covering should not be laid in rooms at a temperature is below 15°C.

Can be installed on underfloor heating (up to 28°C).

Weld the joints (cold-treatment product) to ensure good water-tightness.

Recommended laying methods:

- Loose laying without glue: up to 25 sq. m
- Laying without glue, with double-sided tape or hook & loop strips around the edges of the room: over 25 sq. m

If permanent laying with glue: use a single stick acrylic glue (approximately 250g/sq. m).

Use a finely-notched trowel.

CLEANING & CARE

Regular cleaning with a vacuum cleaner, dust mop or a wet cloth.

Cleaning: with water and a neutral detergent; rinse with clean water.

Stain removal: White Spirit removes almost all stains.

Do not use solvents.

Precautions: do not use floor wax.

Avoid rubber leg caps and casters. Replace with plastic caps and polyamide casters. Protect the bases and legs of your waxed furniture with a felt disc.

HEALTH

LAYING

Gerflor floor coverings are high quality products developed to last. No warranty can be claimed unless the product has been laid according to the following specifications:

The subfloor must be smooth, hard, dry and clean.

Unroll the floor covering 24 hours before it is due to be installed.

The floor covering should not be laid in rooms where the temperature is below 15°C.

Although Home Comfort is resistant to subfloor moisture we recommend that the floor construction should contain a Damp Proof Membrane.

Can be installed on underfloor heating (up to 28°C).

Cold-weld the joints for perfect water-tightness.

Thanks to its special patented composition, Home Comfort can be laid directly on most existing subfloors using loose laying.

SUBFLOOR PREPARATION:

On wooden floorboards and on ceramic tiles: Home Comfort can be laid directly without any subfloor preparation. No levelling compound (finishing) needs to be applied even if there are open joints:

- up to 5 mm wide and a maximum depth of 1 mm in existing tiling
- up to 3 mm wide in wood flooring.

On textile carpeting (felt or needle punch): Home Comfort can be installed directly over the existing carpeting as it has excellent resistance to indentation.

On concrete: Home Comfort can be installed loose-laid or semi-permanently without any special surface preparation. Use double-sided tape along the edges of the room. A rough concrete surface should be treated with a smoothing compound beforehand.

INSTALLATION:

Loose laying: Laying without glue recommended below and up to 35 sqm. Use double sided tape or hook & loop strips around the edges and along the joints for a perfect and invisible fit.

Permanent laying: Laying with glue mandatory above 35 sqm. Use a single stick acrylic glue (approximately 250g/sqm) and a finely notched trowel and cold weld the joints.

CLEANING & CARE

Initial cleaning: Before commencing a regular maintenance programme, initial cleaning of the floor will be necessary to remove dirt accumulated during laying and other building works. Remove debris, sweep floor and vacuum to remove loose dirt. Wash floor with damp mop and using cold water and neutral detergent. Replace the water and solution if necessary. Remove stubborn marks with a non-abrasive pad.

Maintenance: Remove loose dirt with a broom or vacuum cleaner. Wash floor with damp mop and used cold water.

Cleaning: Frequency of periodic maintenance will depend on the amount of traffic and on the type of laying. Wash floor with damp mop using cold water and neutral detergent.

Discoloration: Discolouration can occur in any resilient floor covering if it comes into contact with pigment-containing substances such as bituminous materials, mastic, asphalt, oil, shoes with black rubber soles, or rubber rollers may cause discoloration.

LAYING

Gerflor floor coverings are high quality products developed to last. No warranty can be claimed unless the product has been laid according to the following specifications:

The subfloor must be smooth, hard, dry and clean.

Unroll the floor covering 24 hours before it is due to be installed.

The floor covering should not be laid in rooms where the temperature is below 15°C.

Although Texline is resistant to subfloor moisture we recommend that the floor construction should contain a Damp Proof Membrane.

Can be installed on underfloor heating (up to 28°C).

Cold-weld the joints for perfect water-tightness.

Thanks to its special patented composition, Texline can be laid directly on most existing subfloors using loose laying.

SUBFLOOR PREPARATION:

On wooden floorboards and on ceramic tiles: Texline can be laid directly without any subfloor preparation. No levelling compound (finishing) needs to be applied even if there are open joints:

- up to 5 mm wide and a maximum depth of 1 mm in existing tiling
- up to 3 mm wide in wood flooring.

On textile carpeting (felt or needle punch): Texline can be installed directly over the existing carpeting as it has excellent resistance to indentation.

On concrete: Texline can be installed loose-laid or semi-permanently without any special surface preparation. Use double-sided tape along the edges of the room.

A rough concrete surface should be treated with a smoothing compound beforehand.

INSTALLATION:

Loose laying: Laying without glue recommended below and up to 35 sqm. Use double sided tape or hook & loop strips around the edges and along the joints for a perfect and invisible fit.

Permanent laying: Laying with glue mandatory above 35 sqm. Use a single stick acrylic glue (approximately 250g/sqm) and a finely notched trowel and cold weld the joints.

CLEANING & CARE

Initial cleaning: Before commencing a regular maintenance programme, initial cleaning of the floor will be necessary to remove dirt accumulated during laying and other building works. Remove debris, sweep floor and vacuum to remove loose dirt. Wash floor with damp mop and using cold water and neutral detergent. Replace the water and solution if necessary. Remove stubborn marks with a non-abrasive pad.

Maintenance: Remove loose dirt with a broom or vacuum cleaner. Wash floor with damp mop and used cold water.

Cleaning: Frequency of periodic maintenance will depend on the amount of traffic and on the type of laying. Wash floor with damp mop using cold water and neutral detergent.

Discoloration: Discolouration can occur in any resilient floor covering if it comes into contact with pigment-containing substances such as bituminous materials, mastic, asphalt, oil, shoes with black rubber soles, or rubber rollers may cause discoloration.

CE MARKING

	EN 14041	   
---	----------	---

Areas of use: domestic use

HEALTH

- Formaldehyde-free
- Lead-free, no heavy metals
- Solvent-free
- No harmful plasticizer
- Low VOC emission
- No glue
- GFT backing: > 95% recycled fibres

ENVIRONMENT

- 100% recyclable
- ISO 14001
- Soapy water cleaning

LAYING

The subfloor must be smooth, clean, dry, undamaged and flat.

Recommendations: unroll the floorcovering 24 hours before laying. Floor covering should not be laid in rooms at a temperature below 15°C. Can be installed on underfloor heating (up to 28°C). Weld the joints (cold-treatment product) to ensure good water-tightness.

Recommended laying methods:

- Loose laying without glue: up to 35 sq.m
- Laying without glue, with double-sided tape or hook & loop strips around the edges of the room: over 35 sq.m.
- Laying without preparation if joint <3mm wide and depth <1mm.

If permanent laying with glue: use a single stick acrylic glue (approximately 250g/sq. m). Use a finely-notched trowel.

CLEANING & CARE

Regular cleaning with a vacuum cleaner, dust mop or a wet cloth.

Cleaning: with water and a neutral detergent; rinse with clean water.

Stain removal: White Spirit removes almost all stains. Do not use solvents.

Precautions: do not use floor wax.

Avoid rubber leg caps and casters. Replace with plastic caps and polyamide casters. Protect the bases and legs of your waxed furniture with a felt disc. Avoid double-sided adhesives based on rubber and carpets with rubber backing.

Areas of use: domestic use

HEALTH

- Formaldehyde-free
- Lead-free, no heavy metals
- Solvent-free
- No harmful plasticizer
- Low VOC emission
- No glue
- GFT backing: > 95% recycled fibres

ENVIRONMENT

- 100% recyclable
- ISO 14001
- Soapy water cleaning

LAYING

The subfloor must be smooth, clean, dry, undamaged and flat.

Recommendations: unroll the floorcovering 24 hours before laying. Floor covering should not be laid in rooms at a temperature is below 15°C. Can be installed on underfloor heating (up to 28°C). Weld the joints (cold-treatment product) to ensure good water-tightness.

Recommended laying methods:

- Loose laying without glue: up to 25 sq. m
- Laying without glue, with double-sided tape or hook & loop strips around the edges of the room: over 25 sq. m

If permanent laying with glue: use a single stick acrylic glue (approximately 250g/sq. m). Use a finely-notched trowel.

CLEANING & CARE

Regular cleaning with a vacuum cleaner, dust mop or a wet cloth.

Cleaning: with water and a neutral detergent; rinse with clean water.

Stain removal: White Spirit removes almost all stains. Do not use solvents.

Precautions: do not use floor wax. Avoid rubber leg caps and casters. Replace with plastic caps and polyamide casters. Protect the bases and legs of your waxed furniture with a felt disc.

Areas of use: domestic use

HEALTH

- Formaldehyde-free
- Lead-free, no heavy metals
- Solvent-free
- No harmful plasticizer
- Low VOC emission

ENVIRONMENT

- 100% recyclable
- ISO 14001
- Soapy water cleaning

LAYING

The subfloor must be smooth, clean, dry, undamaged and flat.

Recommendations: unroll the floorcovering 24 hours before laying. The floor covering should not be laid in a room if the temperature is below 15°C.

Laying on underfloor heating is possible (up to 28°C).

Weld the joints (cold-treatment product) to ensure good water-tightness.

If permanent laying with glue: use a single stick acrylic adhesive (approximately 250g/sq. m).

Use a finely-notched trowel.

CLEANING & CARE

Regular cleaning with a vacuum cleaner, dust mop or a wet cloth.

Cleaning: with water and a neutral detergent, rinse with clean water.

Stain removal: White Spirit removes almost all stains.

Do not use solvents.

Precautions: do not use floor wax.

Avoid rubber leg caps and casters.

Replace with plastic caps and polyamide casters.

Protect the bases and legs of your waxed furniture with a felt disc.

Areas of use: domestic use

*Wear-layer
TopFinish treatment*

A printed, compact PVC layer

*A reinforced fiber-glass interlayer
for dimensional stability*

*An extra layer of foam cushioning
for additional comfort underfoot*

HEALTH

- Formaldehyde-free
- Lead-free, no heavy metals
- Solvent-free
- No harmful plasticizer
- Low VOC emission

ENVIRONMENT

- 100% recyclable
- ISO 14001
- Soapy water cleaning

LAYING

The subfloor must be smooth, clean, dry, undamaged and flat.

Recommendations: unroll the floorcovering 24 hours before laying.

The floor covering should not be laid in a room if the temperature is below 15°C.

Laying on underfloor heating is possible (up to 28°C).

Weld the joints (cold-treatment product) to ensure good water-tightness.

If permanent laying with glue: use a single stick acrylic adhesive (approximately 250g/sq. m).

Use a finely-notched trowel.

CLEANING & CARE

Regular cleaning with a vacuum cleaner, dust mop or a wet cloth.

Cleaning: with water and a neutral detergent, rinse with clean water.

Stain removal: White Spirit removes almost all stains.

Do not use solvents.

Precautions: do not use floor wax.

Avoid rubber leg caps and casters.

Replace with plastic caps and polyamide casters.

Protect the bases and legs of your waxed furniture with a felt disc.

Areas of use: domestic use

HEALTH

- Formaldehyde-free
- Lead-free, no heavy metals
- Solvent-free
- No harmful plasticizer
- Low VOC emission

ENVIRONMENT

- 100% recyclable
- ISO 14001
- Soapy water cleaning

LAYING

Laying recommendations: Gerflor floorcoverings are high quality products developed for a long life.

Any warranty claim will only be considered if the product has been laid according to the following specifications:

- The subfloor must be smooth, hard, dry and clean.
- Unroll the floorcovering 24 hours before it is due to be installed.
- During laying, the room temperature may not be below 18°C, and the ground temperature below 15°C.

Permanent installation/full stick:

- Use a single stick acrylic glue (approx. 250 g/sq.m)
- Use a finely notched trowel and cold weld the joints.

CLEANING & CARE

Initial cleaning: Before commencing a regular maintenance programme, an initial cleaning of the floor will be necessary to remove dirt accumulated during installation and other building works. Remove debris, sweep floor and vacuum to remove loose dirt. Wash floor with damp mop and bucket containing cold water and neutral detergent. Replace the water and solution if necessary. Remove stubborn marks with a non-abrasive pad.

Maintenance: Remove loose dirt with a broom or vacuum cleaner. Wash floor with damp mop and bucket with cold water.

Cleaning: Frequency of periodic maintenance will depend on the level of traffic and on the nature of the installation. Wash floor with damp mop and bucket containing cold water and neutral detergent.

Discoloration: All resilient floor covering can discolour due to the transference of colouring substances. Contact with bituminous materials, mastic, asphalt, oil, shoes with black rubber soles, or rubber rollers may cause discoloration.

INSTALLATION SOLUTIONS

V 107 HOOK & LOOP TAPE FOR TEXTILE BACKING

Technical description:

- ▶ Width: 107 mm
- ▶ Packaging: 4 x 25 lm rolls
- ▶ Code: 0556 0001
- ▶ EAN: 3475710213823

Application:

V107 allows the installation of vinyl floor coverings with textile backing on the perimeter and under joints

Implementation :

1-PREPARATION

- Store rolls (unwound) 24h before laying in the room to be made
- Ambient temperature: minimum 15 ° C
- Provide suitable tools: pencil, cutter, crooked blade, meter, ruler and razor
- The support must be dry and clean
- Please refer to the laying advices for your floor.

2-HOW TO USE V107 ?

- Fix the floor using V107 hook and loop tape around the room and at the exact location of the joint
- Rub the floor immediately after installation
- Apply the first strip
- Conitnue following the edge of the previous one without leaving any space
- Cut the floor at the periphery

V107 QUICK AND EASY

INSTALLATION

REMOVAL

COLD WELD

Quick to implement
Application on all types of PVCs except homogeneous ones
Does not require specific equipment
No watertightness

The product is inserted by dry joint between the floor coverings to ensure the weld (SG 916)

Gerflor offers SG916, a solution for cold treatment of joints:

- Cold treatment of joints for sheet floor coverings
- **Colourless** solution used irrespective of the material colour
- **Excellent finishing quality:** prevents all visible joint line traces joint

Packaging

1 x 500 ml metal can
1 x plastic bottle
2 nozzles
3 adhesive-tape rolls of 50 lm

- Wait at least four hours before using the rooms
- Observe all the usual precautions: contains a flammable solvent.

HOW TO CARE FOR YOUR GERFLOR FLOOR

Safety tips

- Use plastic coasters or felt pads under the feet of furniture and other heavy objects
- Protect from sources of heat and spills.

Cleaning

Regular cleaning: use a vacuum and a damp mop with a standard, no-rinse detergent solution. Gerflor recommends using its Power Cleaner for routine cleaning.

Deep cleaning (every 6-12 months): to make your floor shine like new again, use a restorative product. Gerflor recommends using its Renovator Polish to protect and enhance the look of your floor. It leaves a matte finish and brightens up colours.

Stubborn stains: use diluted bleach, white spirit, alcohol or lemon juice.

- stains such as tomato sauce, mustard, beet juice, blood, ink and iodine: use diluted bleach, allowing it to sit for several minutes and then rinsing thoroughly.
- rust stains: clean with fabric rust remover and rinse thoroughly.
- marker, pen, grease and glue stains: rub gently with a cloth moistened with white spirit, and rinse thoroughly

Products to avoid: acetone, chlorinated solvents such as trichlorethylene, wax, glaze.

COMMUNICATION TOOLS

A USEFUL SET OF SALES TOOLS, AVAILABLE TO HELP YOUR SALES TEAMS PRESENT AND PROMOTE GERFLOR PRODUCTS IN-STORE FOR MORE :

- Impact upon end consumers
- Information on products' benefits
- Decoration strength
- Laying advice on videos
